

Case Study for Web Site Production a Project Manager's Perspective

Goals

Explain the site production process and the role the project manager played in the sites production. Uses a simple problem/solution approach to te various production stages. I wanted to share my experience as a project manager and to communicate my problem solving abilities.

Target Audience

Those interested in the process of producing a web site with a team. Those interested in the project manager's role. This might aslo be a useful tool for anyone teaching about team production.

Information Architecture

Information rich site set up in a linear fashion. Explains the steps involved in site production.

Design

Straight forward linear navigation. Has somewhat of a corporate or informational feel to the site. The site is text heavy and benefits from clean simple design.

Technology

XHTML

CSS

Adobe Illustrator

Adobe Photoshop
